

Title: 9 Billion People + 1 Planet = ?

Date: Oct 17, 2009 01:00 PM

URL: <http://pirsa.org/09100153>

Abstract: This discussion explores the promise and perils of the next 50 years. Can humanity, heading toward a population of approximately 9 billion, advance economically without overheating the planet? Can food and water supplies be sustained without erasing what's left of wild nature?
